

# Your 2025 Financial Summary

Total Income: \$265,478.02

Total Expenses: \$262,251.16

👉 Net Profit:

\$3,226.86

👉 Profit Margin:

~1.2%

## Reality Check (No sugarcoating)

You are essentially **running break-even**.

- You're doing **\$265K in revenue**
- But only keeping **\$3K**

👉 That means:

You're working full-time... for almost no real profit.

## Where Your Money Is Going

### 1. 💣 Payroll (BIGGEST COST)

- \$53,600+

👉 If you're a solo owner-operator:

- This is extremely high
- Either:
  - You're paying drivers
  - Or paying yourself inefficiently

---

## 2. 🚨 Loans (Crushing Your Cash Flow)

- SBA Loan: **\$21,043**
- Other Loan: **\$8,923 + \$7,345**
  - 👉 Total Loan Payments: **~\$37K+**

👉 This alone is **~14% of your revenue**

---

## 3. 🚨 Entertainment (This is a Problem)

- **\$13,000+**

Includes:

- Sports events
- Bars
- Detroit events

👉 This is NOT business-critical spending.

---

## 4. 🚨 Meals (Way Too High)

- Easily **\$20K+ combined**

👉 Industry norm:

- Should be **\$5K–\$10K max**
- 

## 5. 🚨 Truck Repairs & Maintenance

- **\$30K–\$40K range** (multiple large repairs)

👉 This tells me:

- Truck may be aging
- Or maintenance is reactive (not preventative)

---

## 6. 🚧 Travel + Hotels

- \$10K+

👉 Combined with meals = lifestyle bleed

---

## 7. 🚧 Subscriptions & Misc

- Netflix, SiriusXM, etc.
- Personal mixed into business

👉 This muddies your financial clarity

---

# 🧠 Biggest Problems (Strategic)

## ❌ 1. You're Mixing Personal + Business

- Entertainment
- Liquor
- Grooming
- Shopping
- Withdrawals

👉 This hides your real profitability

---

## ❌ 2. Your Cost Structure Is Out of Control

You're losing money in:

- Lifestyle spending
- Debt payments
- Inefficiency

---

### 3. Truck Is Likely Bleeding You

High:

- Repairs
- Maintenance
- Fuel spread

👉 This is a classic sign of:

- Aging equipment OR
  - Poor route selection
- 

### 4. Cash Flow Leakage Everywhere

- ATM withdrawals
- Zelle payments
- Unknown expenses

👉 This is where businesses silently die

---

## What You're Doing RIGHT

### 1. Strong Revenue Base

- \$265K is solid for an owner-operator

👉 You have earning power

---

### 2. Fuel Tracking Exists

- You're logging fuel correctly

👉 That's good operational discipline

---

### ✓ 3. You're Investing in the Business

- Repairs, tools, insurance

👉 You're not neglecting the truck

---

## The Hard Truth

Your problem is NOT revenue.

Your problem is **spending discipline + structure**.

---

## What I Would Do (If This Was My Truck)

### 1. 🔥 Cut \$30K–\$50K Immediately

Target:

- Entertainment → cut 80%
  - Meals → cut 50%
  - Subscriptions → eliminate
  - Misc/unknown → audit EVERYTHING
- 

### 2. 🚚 Re-evaluate Your Truck

If:

- Repairs > \$25K/year

👉 Consider:

- Selling or upgrading
- Or switching lanes

---

### 3. 💰 Fix Your Pay Structure

- Stop random withdrawals
  - Pay yourself a **fixed weekly salary**
- 

### 4. 📊 Track THIS Weekly

- Cost per mile (CPM)
  - Revenue per mile (RPM)
  - Profit per load
- 

### 5. 📅 Separate Business vs Personal (Critical)

Right now:

👉 You don't know your real profit

---

## 📈 What Your Business SHOULD Look Like

At your revenue level:

- Expected Profit: **\$40K – \$70K**
- Current Profit: **\$3K**

👉 You're leaving **\$40K+** on the table

---

## ⚡ Final Assessment

🟡 Overall Score: 4 / 10

- Revenue: ✅ Strong
  - Operations: ⚠️ Average
  - Financial discipline: ❌ Weak
- 

## Bottom Line

You don't have a trucking problem.

You have a **financial control problem**.

Fix that—and this becomes a **profitable business fast**.
